e-Waste management process includes the following:

- **Collection:**

  Gathering e-waste from various sources,enterprises, organizations and individuals.

- **Dismantling:**

  Disintegration of all the components andmaterials of the e-waste to analyse which can be reused andwhich can go as scrap.

- **Data Sanitization:**

  Ensuring that data is rendered unusable oris completely wiped out to ensure it cannot be retrieved inany possible way.

- **Recycling:**

  Complete segregation of parts and materials thatis then used to build new electronic products.

- **Refurbishing:**

  Reuse of the working, good quality products toreplace parts and extend the life of other electronic equipment.

- We use stringent procedures to ensure that the e-waste ishandled with care.
- E-Waste Collection and Transportation
- Sorting and Shredding if required
- Categorizing into core materials and components
- Dust Extraction and Magnetic separation
- Preparing the recycled materials for sale
