7.1.4 Documentary evidence in support of the claim

Infrastructure for proper storage of water, recycling water, and avoiding wastage of water is embraced. The staff and students are educated through the policies and awareness programmes on conservation measures to be adopted.

Rain Water Harvesting

The rainwater harvesting system is in place for collecting the rainwater falling on the rooftop of the college building. This helps in recharging the groundwater table throughout the year.

Conservation of Water Bodies

The College organized a Webinar on "Conservation of Water Bodies" on 22.07.2020. The student teachers were given input on how to conserve water at domestic places and in institutions. The student teachers were motivated to take a pledge to save water.

World Water Day Celebration

An awareness programme on International Water Day was organized on 22nd March 2021. The student teachers were motivated to take a pledge to save water during the event. Skits and Motivational videos were played to motivate the students to preserve and conserve water. The student teachers were made to take an oath and promised to save water.

Reservoirs/tanks/ bore wells

The college has an underground reservoir to store metro water. Four overhead tanks and six syntax tanks are available to fulfill the water requirements of the college and Hostel. Three Bore wells, one in the college campus and the other two in the hostel are used for additional water requirements apart from metro water usage.

Water recycling

Water for washing hands is stored in small tanks and used for gardening in campus. The bore water that is high in iron content and yellow in color is treated and the water is further refined with RO plant and used for drinking water. The rest of the water is utilized for toilets.
