Formulating Learning Objectives

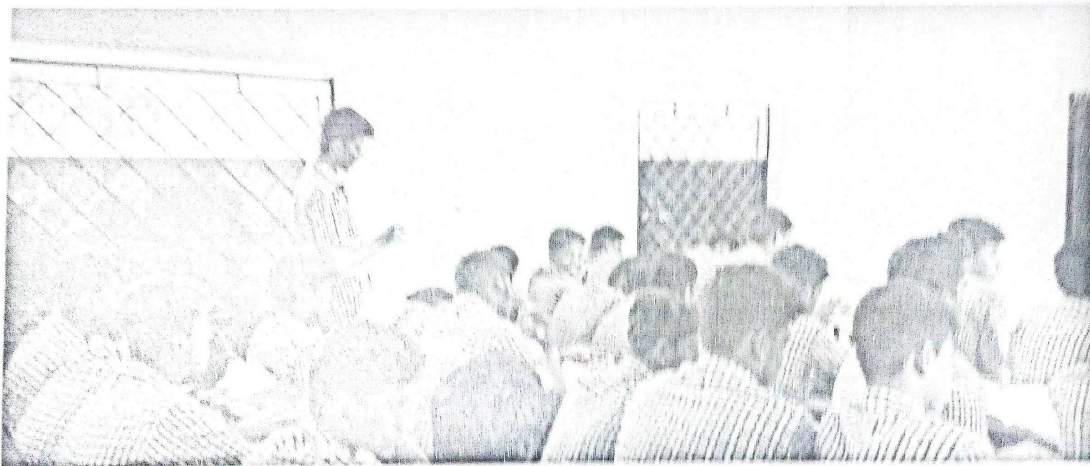

The faculty members teach the student teachers the General Instructional Objectives (GIOs) and Specific Instructional Objectives (SIOs) of teaching and learning with reference to Blooms Taxonomy of learning. The entire lesson plan format such as GIOs, SIOs, Teaching Learning Material used, Motivation, Set Induction, Presentation, Summary, Recapitulation, Evaluation and Assignment are taught step by step with relevant examples. As a consequence, the student teachers in turn prepare the lesson plans on various topics effectively implementing the above lesson plan format accordingly. Students go through a set of activities as preparatory to school-based practice teaching and internship. Pre practice teaching, internship orientation and training encompasses certain significant skills and competencies. Student teachers prepare the lesson plans before going to various schools for the internship. The faculties evaluate the written lesson plans, gives feedback to the student teachers and the corrections are carried out by the student teachers.

Lesson Planning/ Individualized Education Plan

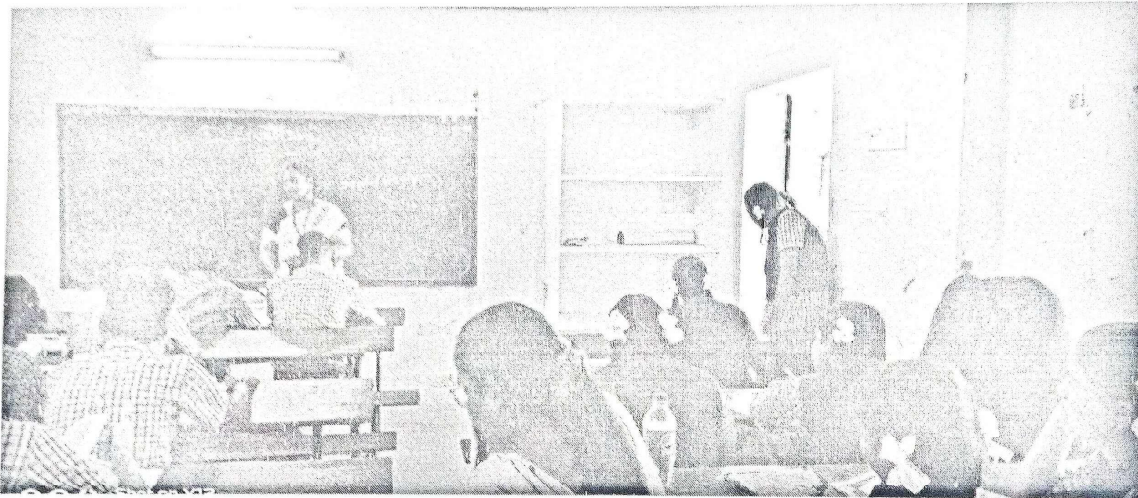

The preparation of the lesson plans is of utmost importance in the internship process. The inputs regarding the General Instructional Objectives, Specific Instructional Objectives, Action Verbs, Concept of Microteaching and techniques of Evaluation are oriented to the students in the beginning of the second semester. The students were given practice in Microteaching skills through a three-day Workshop for various subjects with a prior demonstration by the teacher educators. The general orientation regarding Bloom's Taxonomy and format of a lesson plan is given during second semester every year before internship. The lesson plan was taught in two formats namely Herbartian and Active learning Method. The concerned teacher educators trained the students in writing and mastering the formats before the internship session. Hence the student teachers were trained in a systematic manner in lesson plan writing before internship in schools.

Dealing with Student Diversity in Classrooms

The student teachers are given a wide range and scope of inculcating and imbibing knowledge on education, philosophy, psychology, methods, techniques and strategies of learning. The whole process of training enables them to identify the individual differences of the students with respect to kinds of learners such as audio, visual and kinesthetics learners and the type of learners who are slow, average, above average learners and achievers. Hence the student teachers are provided knowledge and training to fulfil the scope, need and demands of the types of learners. Adding the institution provides a number of exposures to the student teachers on special schools through field visits.

Addressing Inclusiveness

Student teachers are provided training to meet the special needs of school children. Collaborative working is essential in order to assist children, parents and families to accept and understand inclusive education. Creating an Inclusive school course provides information of inclusive education, identification of children with diverse need, curricular adoption and strategies, and role of teacher in inclusive school. Visit to St. Louis Institute for the Deaf and the Blind, Mithra rehabilitation center give exposure to student teachers on inclusiveness and to know about Braille learning method and sign language. In addition, lectures on inclusive education were organized.

Assessing Student Learning

The student teachers are provided orientation and hands on experience in preparation of achievement tests. The student teachers use the knowledge gained to construct and conduct unit tests during internship to evaluate the level of understanding and performance of students as well as the effectiveness of student teachers in teaching.

Evolving ICT based learning situations

The College facilitates the students with technology like smart board, language labs, LCD projectors and computers to transact the learning materials during the teaching learning process. The student teachers are oriented and provided hands-on experience to use educational apps for learning and they apply the knowledge and experience of using educational apps for teaching effectively in their internship schools with available ICT tools. The pandemic COVID-19 enable teaching faculty and the learning community to explore the online learning platforms such as google classroom, google meet, zoom meet and podcast etc for effective and meaningful learning outcome.

Exposure to Community Engagement

Community engagement is a form of experiential education where students engage in activities that address community needs. This form of learning emphasizes collaboration between students, faculty, and the community. Student teachers are given training for community engagement activities through NSS, RRC, YRC, Women Cell and Eco-Club before they go for internship training and it encompasses certain significant skills, where they learn to organize and participate in local or National priority programme during teaching practice. Student teachers act as volunteers that make the NGOs and other organization so remarkable. Each programme they conduct for welfare of the society is incredibly generous and imaginative. Student teachers are
